Coverflex Modular Walkways

Faster installs. Lower risk.
Smarter site setup.

Where the Real Value Comes From

Program Certainty
Delivered and installed in days - not built over multiple trades and timelines.

Minimal Site Works
No concrete, no excavation, no heavy prep.

Simplified Delivery
One system. One supplier. No coordination of footings, structure, roofing and trades.

Reduced Site Disruption
Short install window with minimal noise, congestion, and follow-on works.

Flexibility On Site
Relocate, extend or reconfigure as your project evolves.

Low Ongoing Maintenance
Open, elevated design eliminates build-up underneath.

Designed to Reduce Safety Risk

Reduced Working at Heights
Majority of assembly completed at ground level with controlled lift install.

Simplified Compliance
Fewer trades, fewer interfaces, easier SWMS and approvals.

Controlled Installation
Crane-based install vs extended on-site construction.

The Commercial Impact

$25k+ lifecycle saving per 24m walkway

- Concrete eliminated $5k - $15k
- Minimal waste & disposal $2k - $6k
- Reduced prelims & labour $3k - $8k+
- Simplified removal Lower demolition cost

Designed to reduce risk.
And maximise value.
