

DUNALLEY PRIMARY SCHOOL

CLIENT	Dunalley Primary School
LOCATION	Dunalley, TAS
SIZE	5 classrooms+ admin building + toilet facilities
TIMELINE	Temporary facilities onsite within 4 weeks

In early January, 2013, devastating fires razed much of the Tasman Peninsula. Many small towns and communities suffered immeasurable losses, but few moreso than the town of Dunalley, located 57km east of Hobart.

Ausco Modular responded quickly to the tragedy and supplied temporary buildings for the school whilst it is rebuilt

Five classrooms, one staff and administration building, one library and a number of toilet blocks were installed at the school site and ready for use within four weeks of the fires and staff and students were able to commence the school year on time.

Ausco Modular maintains a dedicated team of employees and subcontractors in Tasmania, further enabling them to respond quickly to the crisis by leveraging the company's national capabilities.

Similarly, Ausco Modular's high level of flexibility in the overall layout of the school allowed the client to complete final designs during installation of the building, thus ensuring the project was turned over as quickly as possible.

The client was extremely pleased with the fast turn around time, and how the requirements of the school were so easily met by Ausco Modular's range of products and customisation options.

With more than 50 years' experience working within the modular industry and proven skills in developing solutions for educational institutions across Australia. Ausco Modular is extremely proud to be a part of the rebuilding of the Dunalley community.

Ausco Modular responded quickly to the tragedy and supplied temporary buildings for the school whilst it is rebuilt.

Buildings were installed at the school site and ready for use within four weeks of the fires.
