

## Eastern Fleurieu R-12 School

CLIENT  
Department for Education SA

LOCATION  
Strathalbyn, SA

ARCHITECT  
Das Studio

TIMEFRAME  
6 months

NUMBER OF MODULES  
13

Nominated by the Department for Education for Accelerated Schools Building Program, Ausco Modular was contracted by Sensum to deliver turnkey buildings for Eastern Fleurieu R-12 School in South Australia.

The buildings are made up of 13 modules, which were delivered from our Adelaide manufacturing facilities, and ready to support year 7-12 cohort. A big benefit of a modular building is most of the construction occurs off-site, which allowed the school to function with minimum interruptions.

The students and staff are enjoying their new facilities which are located right in the heart of the school. The new spaces consist of a spacious and well-equipped home economics room, two science rooms with storage, serviced learning areas, a teacher preparation space and deck area.

The buildings are sustainable and innovatively designed, with a comparable lifespan to bricks and mortar structures.
