

# Glenelg Oval

 CLIENT  
City of Holdfast Bay

 LOCATION  
Glenelg East, SA

 ARCHITECT  
Ausco Modular

 TIMEFRAME  
6 months in total  
(delivered & installed in 2 days)

 NUMBER OF MODULES  
8 modules

Ausco was contracted by the City of Holdfast Bay in early March 2021 to provide new changeroom facilities for Glenelg Oval. The eight modules were delivered to the site in July with completion in August. That is a major advantage of modular constructed buildings, the quick turnaround as the majority of the production took place in our Edinburgh North facility in Adelaide, saving between 4-6 months compared to an on-site build. It also meant there was minimum disruption to the teams as they continued to train and host games during the construction.

Everyone at the club was amazed to see the building modules being delivered on trucks and craned into position and installed in only two days. They were also excited to see the architecturally designed and modern building in their club colours.

The smart design of 2-4 changerooms that are interchangeable with operable walls now enables men and women of the Glenelg Football and Glenelg Cricket clubs to better utilise their facilities. They also enjoy two new umpire rooms, two trainer's rooms and public toilets.

On behalf of the City of Holdfast Bay, I would like to thank your team on the successful delivery of the Glenelg Oval uni-sex changeroom building.

I was particularly impressed with the way Ausco solved the issue of logistics, constructing the changerooms in modular technology for a building site with tight access, and lifting the building modules over the school during the holiday period.

Matthew Rechner, City of Holdfast Bay
