

Facility management

We offer a range of facility management services to keep your buildings clean and functional. Whether you require commercial cleaning of your buildings, inspections (test and tag) of electrical equipment or fire system servicing to ensure regulatory compliance, Ausco has you covered.

Commercial cleaning

- Regular and periodical cleaning of your buildings, maintaining cleanliness and longevity
- Management of building waste including emptying bins and proper disposal
- Auditing of your building's conditions to provide you with information on the state of your site

Test and tag

- Inspections of your electrical equipment to ensure they are safe and serviceable
- Scheduled inspections to work around your site or project requirements

Fire system servicing

- Inspection and testing of extinguishers, smoke detectors, emergency lighting and other fire safety equipment
- Comprehensive service to ensure your fire protection equipment is functional and compliant with fire safety legislation
