

Power smarter. Save harder.

**Sick of fuel? Got a headache from the noise of the generator?
Tired of flickering lights in the project office?**

Ausco's new hybrid generator is the solution you have been waiting for. A single system that combines solar panels, a battery, and a generator to power the site day or night.

Harness the sun and battery during the day for noiseless, fuel-free power and enjoy the security of a generator for night works and trickle charge.

Hybrid Solution	Power capacity	Estimated Fuel-saving per month ⁺	Estimated CO ² savings in kg per month ⁺
POD10	10kVa/1-3 Ausco site buildings*	1031 litres/month	2241 kg/month
POD20	20kVa/up to 6 Ausco buildings*	1114 litres/month	2420 kg/month
POD30	30kVa/up to 8 Ausco buildings*	1569 litres/month	4295 kg/month

* generator to building ratio is based on assumed power consumption

+ savings are estimated and will vary depending on individual load experienced on site

Want to save even more?

Combine the Ausco hybrid generator with our ECO Upgrade buildings and save even more fuel, improving your site's sustainability is a bonus.

Ausco Modular is committed to providing sustainable site solutions that don't cost the earth.

Harness the sun and battery during the day for noiseless, fuel-free power and enjoy the security of a generator for night works and trickle charge.
