

2

LSR 2

Position yourself in a safe zone away from moving & energised equipment.

RISK

Shared work zones can increase the risk of people being hit or crushed by moving objects, fixed plant and mobile equipment.

WHERE THIS RISK MAY APPLY TO YOU:

- > Forklift, trucks moving around yards;
- > Building being transported and loaded / unloaded on to trucks;
- > Cranes slewing buildings or equipment on sites;
- > At the base of a building, crane or EWP;
- > Under a vehicle during repair;
- > Near sources of electricity;
- > Loading and unloading ancillary equipment (such as filing cabinets);
- > Stacking and unstacking boxes, pallets and equipment;
- > Working on a surface that could move unexpectedly;
- > When using power or hand tools;
- > Other areas where access restrictions apply.

PERSONAL BEHAVIOURS

- > I have completed a risk assessment activity.
- > I can stay on designated walkways & out of restricted work areas.
- > I can keep out of the line of fire; by staying out of impact or crush zones.
- > I can tell others working in the area about the risks and the restrictions.
- > I can check that people unfamiliar with our site remain in 'safe zones'.
- > I can restrict and control access to the work zone and identify who is in charge.
- > I can use barricades or other form of barrier to protect myself & others.
- > I can check I have enough resources, supervision to monitor and control access.
- > I can choose not to enter a restricted area or zone that you do not have authority or reason to be in.
